PROJECTS

Voice-Based Email System for Visually Challenged Users

- Developed a system enabling visually impaired users to send and receive emails using voice commands.
- Integrated speech-to-text and text-to-speech technology for seamless user interaction.
- Implemented Interactive Voice Response (IVR) for simplified user navigation.
- Used AI-driven speech recognition to interpret voice commands.

Weather Application

- Developed a responsive web application providing real-time weather updates and forecasts.
- Used HTML, CSS for UI design and JavaScript for API integration to fetch real-time data.
- Ensured cross-device responsiveness for an optimal user experience.

Event Management System for College

- Designed and built a web application to streamline campus event planning, registration, and ticket booking.
- Developed frontend using React.js and designed UI with Figma.
- Implemented backend with Node.js and Express.js, using MongoDB for data storage.

TECHNICAL SKILLS

- Programming Languages:** Python, C, Java, JavaScript
- Technologies:** Linux, HTML, CSS, React.js, Node.js, MongoDB
- Tools:** Git, Figma

ADDITIONAL INFORMATION

- Hackathons:** Participated in Hacknovate 2.0
- Achievements:** 1st Prize in Kabaddi Tournament, Gold Medal in 100m Race (District Level)
